

## CORPORATE

- All html pages are in **/app/views/corporate.**
- All code in **/app/controllers/corporate\_controller.rb.**
- All code related database in **/app/models.**
  1. corporate\_user.rb
  2. corporate\_question.rb
  3. corporate\_resume.rb
  4. recruiter\_user.rb
  5. corporate\_role.rb
  6. corporate\_application.rb
  7. corporate\_team\_member.rb
  8. corporate\_company.rb
  9. corporate\_invite\_member.rb

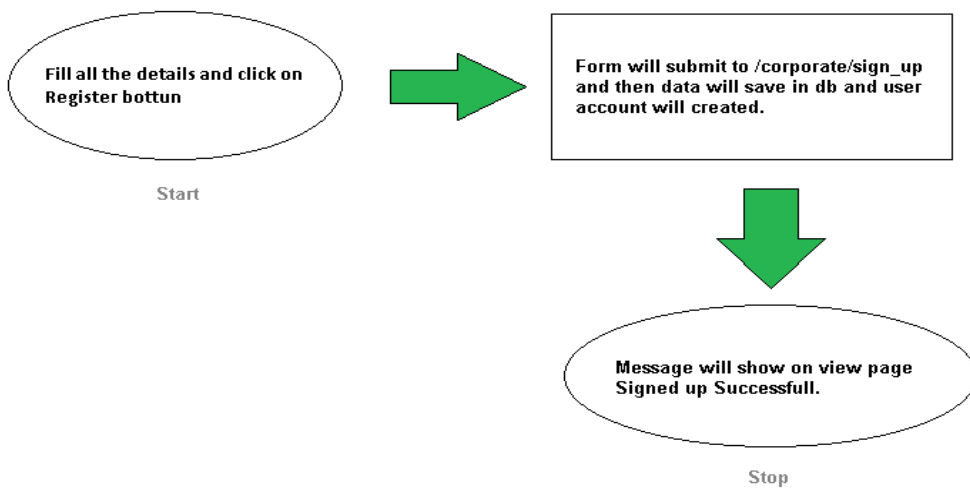

## LOG IN

- When you click on log in button it call a fuction **corporate\_login** in **corporate\_controller.rb .**
- If fatch data by email from database using **corporate\_users.rb** model if exist if it is not exist in **corporate\_users.rb** then it will find in **recruiter\_users.rb .**
- And if user's email and password are correct then we create **session** and set **islogin** variable in **session** true.
- And when successfully logged in it will redirect you to **dashboard** page.

## REGISTRATION

- When you click on **Sign up** button it will ask you **Are you a recruitment company?** .
  1. **Yes** ->open a form called **registration** for Recruiter.
  2. **No** ->open a form called **registration** for Corporate user.
- After filling all details when we click on **REGISTER** button then it submit form to **/corporate/sign\_up** with all details.
- Then it create a record in database using **corporate\_users.rb** model.
- And show a popup that **Signed up successfully**.
- Then you can log in with that account.

## FORGOT PASSWORD

- If you forget your password then click on **Forgot password?.**

The image shows a 'CORPORATE LOGIN' form on a light blue background. It features two input fields for 'Email' and 'Password'. Below the password field is a link for 'Forgot password?'. At the bottom are two buttons: 'LOGIN' and 'REGISTER'.

- Then it will open a pop up.

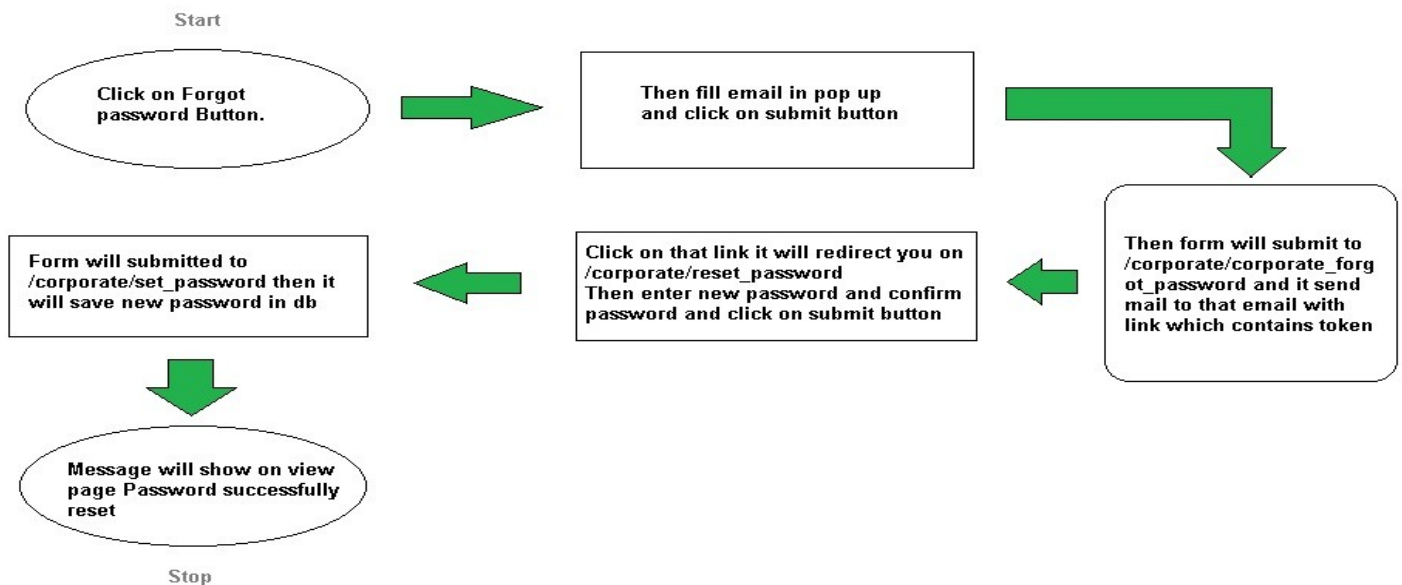

The image shows a 'CORPORATE LOGIN' interface. At the top, there is a modal window titled 'FORGET PASSWORD' with a close button (X) in the top right corner. Inside the modal, there is an input field labeled 'Email' and a 'submit' button. Below the modal, there are two buttons: 'LOGIN' and 'REGISTER'.

- Then enter email and click on **submit** button. It will call **/corporate/corporate\_forgot\_password**.
- Then it will send a link with **token** on your email if your email exists in the database.
- When you click on that link it will redirect you to **/corporate/reset\_password** if it is a corporate user, and if it is a recruiter then **/recruiter/reset\_password**.

The image shows a 'SET YOUR PASSWORD' form. It has two input fields: 'NEW PASSWORD' and 'CONFIRM PASSWORD'. Below these fields is a 'Submit' button.

- Then enter **NEW PASSWORD** and **CONFIRM PASSWORD**. And click on **Submit** button.
- Then the form will be submitted to **/corporate/set\_password**.
- Then it checks if the user exists in **corporate** or in **recruiter**.

- And then save then in password in that perticular user db.
- Once you set a new password token will delete from db and when again you try to reset password with the same link wit will not able to find token in db .so this link will **expire** and it will no longer work.

## LOGS

- For creating log i have define a method **logger** in **corporate\_controller.rb** with one parameter which contain information that we are to write in log file.
- And we call this function whenever any exception is occured.
- And we have also call **/corporate/record\_log** from **corporate.html.erb** layouts from **record\_log** function of js . And **logger** method is called from **/corporate/record\_log** .
- And whenever we need to create log from view we can call **record\_log** function of js with information.

# DASHBOARD

➤ After log in we redirected to **Dashboard** page.

➤ Where we found three section .

1. Roles

2. Applicants

3. Team Members

## ➔ Roles

➤ Here we can see all role (if any exist) created by you or your team members.

➤ And you can also create a new role by clicking on **ADD NEW ROLE** button.

➤ It will ask you number of fields to fill .

➤ At the end it will show **summary page** which contains all thing filled by you .

➤ And after that click on **submit** button.

➤ After successfully create role it will redirect you on **dashboard** page and here you can see role created by you .

GO

CLEAR FILTER

- After selecting and filling value of any filter from above click on **GO** button. It will call **submit\_form('corporate/filter\_applicants')** function of js.
- And id send data to **corporate/filter\_applicants** method using ajax and in this method applicants are filtered and result send back to ajax .
- And it set the result to view page .

## SORT

- Sort is for sort the applicants in Ascending and Descending order .
  - it uses following properties to sort applicants.
1. Salary
  2. Career Level

3. Years of Experience
4. Date of Application
5. Responsibility Score
6. Effectiveness Score
7. Impact Score

**SORT BY SINGLE FACTOR:**

[ADVANCED OPTIONS](#)

☐ Ascending

☐ Descending

☐ Salary

☐ Career Level

☐ Years of Experience

☐ Date of Application

☐ Responsibility Score

☐ Effectiveness Score

☐ Impact Score

GO

CLEAR FILTER

- For sorting applicants select any property from above and you can also select order Ascending or Descending .
- Then click on **GO** .
- It will call **submit\_form('/corporate/sort\_applicants')** of js .
- And id send data to **/corporate/sort\_applicants** method using ajax and in this method applicants are sorted according to properties and result send back to ajax .

## ➔ ADVANCE OPTIONS

- if you click on **ADVANCE OPTION** button it will open following pop up.

**SORT BY WEIGHTED AVERAGE SCORE:**

[BACK](#) 

☐ Ascending ☐ Descending

Salary (INR Lakhs)

Career Level

Year of Experience

Responsibility Score

Effectiveness Score

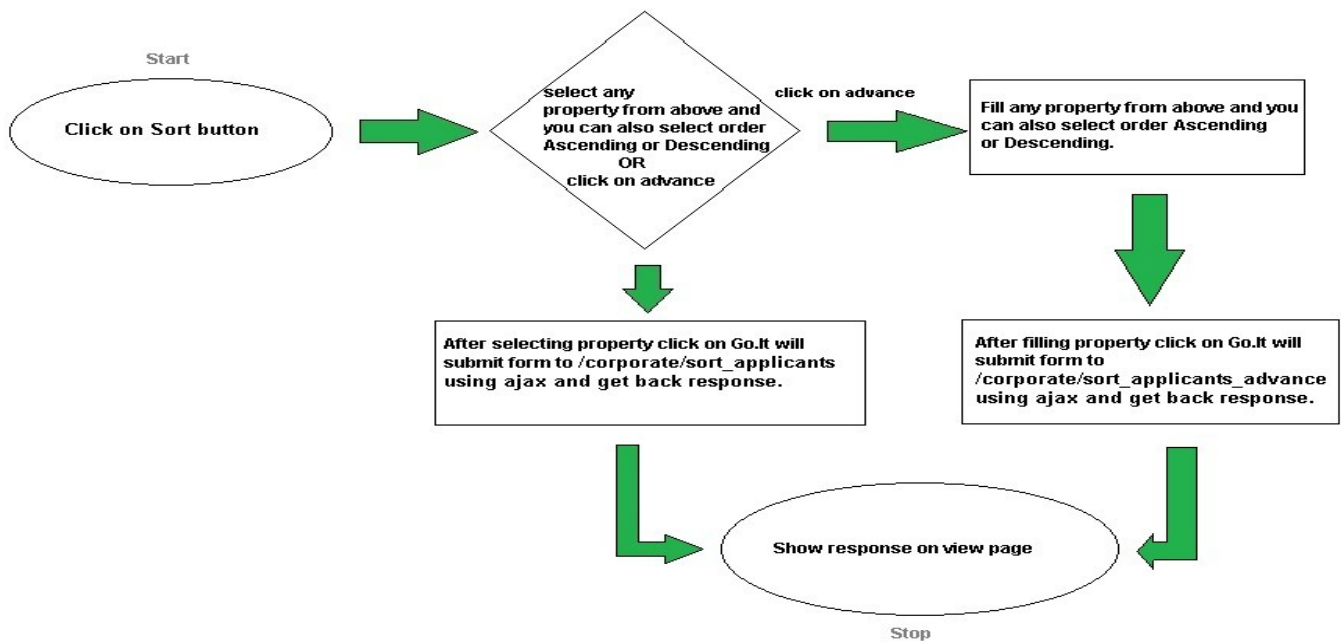

Impact Score

GO

CLEAR FILTER

- For sorting applicants fill any property from above and you can also select order Ascending or Descending .
- Then click on **GO** .
- It will call **submit\_form('/corporate/sort\_applicants\_advance')** of js .
- And id send data to **/corporate/sort\_applicants\_advance** method using ajax and in this method applicants are sorted according to properties and result send back to ajax .
- And it set the result to view page .

## EXPORT

- By clicking **Export** button all applicants details with resume will be download.
- When we click on **Export** button .it calls **download\_data()** of js.
- Then it send request to **/corporate/download\_data** method .it send back all the information of all applicants to ajax.
- Then it download the all applicants details as csv and resume as pdf on browser.

## MY ACCOUNT

- My account is used to edit to details.
- When we click on **My Account** .it will redirect on **/corporate/my\_account** page .
- Then you can click on **Edit** button to edit details .

- You can see in image bellow there no of Edit buttons.
